

Indiana Clean Energy & Transportation Jobs Are Growing

Indiana's clean energy and clean transportation jobs grew almost 4 percent in 2022 and the industry is poised for continued growth thanks to federal climate investments passed last year.

QUICK FACTS

88,412

Clean energy jobs

+9.4%

Growth of jobs in the clean transportation sector, the state's fastest-growing sector in 2022

+3.7%

Growth in clean energy jobs in 2022

Clean energy companies employed more than 88,000 Hoosiers at the end of 2022, an almost 4 percent increase from 2021. Clean energy is a significant part of Indiana's economy. More than 6 times as many Hoosiers worked in clean energy than the number of lawyers, web developers, and real estate agents combined. In 2022, clean energy jobs grew 50 percent faster than the overall economy, and this growth is expected to continue as federal clean energy and vehicle incentives lead to new clean energy projects, a resurgence of domestic manufacturing, and lower upfront costs for homeowners to make energy efficiency improvements.

Clean Energy Jobs* in Indiana

*Visualization based on 2021 data

The biggest sector in Indiana's clean energy industry is energy efficiency, comprising over 57 percent of the state's clean energy workforce. The 50,721 energy efficiency workers in Indiana manufacture ENERGY STAR-rated appliances, install efficient lighting, ventilation, and air conditioning (HVAC) systems, and install advanced building materials in homes and commercial buildings.

As more automakers and their suppliers continued to shift to electric vehicles, the clean transportation sector saw an increase in employment of over 9 percent in Indiana. The sector added almost 1,900 new jobs for a total of 22,058 workers. Electric vehicle-related jobs accounted for most of the sector's growth.

Renewable energy jobs in solar (5% growth) continue to see gains throughout the state while smaller, emerging subsectors like battery storage technologies (5% growth) and grid modernization (12% growth) are also continuing to grow.

Clean energy jobs are found in every corner of the state. While Indianapolis is the largest hub for clean energy with 28,572 jobs, almost 20,000 jobs are in rural areas.

71.3%

Small businesses drive Indiana's clean energy sector – in 2022, 71.3 percent of the state's clean energy businesses employed fewer than 20 individuals

12.7%

More than 12 percent of Indiana's clean energy workers were veterans in 2022

POLICIES MATTER

While recent federal policies, including investments and tax credits for energy efficiency upgrades, EV and solar purchases and new clean energy projects create strong tailwinds, there is still more to do. To meet the nation's climate goals of reducing climate emissions by 50 percent by 2030, improve equity in the clean energy economy and grow clean energy jobs, lawmakers and policymakers should:

- **Defend against attempts to roll back federal clean energy and vehicle investments:** Just one year after the passage of the Inflation Reduction Act, companies are investing over \$86 billion in large scale clean energy projects that will lead to the creation of over 74,000 jobs, thanks to the federal investments and incentives in the new law. Of the 210 projects announced, almost a quarter are in Midwestern states. Attempts to rollback provisions of the federal clean energy incentives threaten future clean energy job growth and economic opportunity.
- **Develop and fund federal and state workforce development programs.** One of the largest barriers to clean energy job growth is the challenge to fill open positions. Workforce training will be critical to the continued growth of the industry, as nearly 84 percent of employers in Indiana report at least some difficulty hiring workers.
- **Expand transmission to increase access for clean energy projects.** Federal and state governments must work with the Midwest regional transmission organizations to build more transmission. Without more transmission, many wind and solar projects will not be built.
- **Advance state-level clean energy policies.** It will be important for Indiana to adopt state policies that support renewable energy, energy efficiency and electric vehicles to leverage federal investment and help create thousands of new jobs.

JOBS BY SECTOR
